## GENERAL INFORMATION

### 1. Purpose and Scope

This Federal Item Identification Guide (FIIG) is a self-contained document for the collection, coding, transmittal, and retrieval of item characteristics and related supply management data for an item of supply for logistical use. This FIIG is to be used to describe items of supply identified by the index of approved item names appearing in this section.

### 2. Contents

This FIIG is comprised of the following:

- Index of Approved Item Names Covered by this FIIG
- Applicability Key Index
- Section I - Item Characteristics Data Requirements
- Section III - New text that should be here.
- Appendix A - Reply Tables
- Appendix B - Reference Drawing Groups (as applicable)
- Appendix C - Technical Data Tables (as applicable)

#### a. Index of Approved Item Names Covered by this FIIG:

The index lists the approved item names with definitions and item name codes as they appear in Cataloging Handbook H6, applicable to this FIIG. In addition, each name entry is assigned an applicability key for use in relating the characteristics requirements in Section I to the specific item name.

#### b. Applicability Key Index:

The purpose of this index is to provide the user with a ready reference for determining the specific requirements which are applicable to a given approved item name. This index lists all requirements in sequence as they appear in the FIIG. The applicability of a Master Requirement Coded requirement is indicated by the column headed by the specific item name applicability key as follows:

(1) The letter "X" indicates the requirement must be answered for a full descriptive item.

(2) The letters "AR" indicate the requirement is to be answered as required by (1) instructional notes within the FIIG; (2) when the reply is predicated on replies to a related main requirement; or (3) when an asterisk (\*) is used in conjunction with the applicability key column in Section I.

(3) A blank in the column indicates the requirement is not applicable to the specific item name.

## GENERAL INFORMATION

### c. Section I - Item Characteristics Data Requirements:

This section contains the physical and performance characteristics requirements needed to describe and identify an item of supply. These characteristics differentiate one item from all other items of supply and are to be used to meet the needs of all supported functions. This section is arranged in columns. Identification of each column and instructions pertinent thereto are as follows:

#### (1) Applicability Key:

The first column shows the applicability key(s) for each requirement. It indicates whether the requirement need be satisfied for the item being identified. "ALL" indicates that the requirement must be answered for all items covered by the FIIG. One or more alphabetic character(s) or group of one or more alphabetic characters indicates a response is required when describing items with an approved item name or names represented by the key(s). An asterisk (\*) used in conjunction with any applicability key indicates that the characteristic stated in the requirement may not be applicable to all items covered by the FIIG.

#### (2) Master Requirement Codes (MRC):

A four-position code which is assigned to a FIIG requirement for identification of the requirement, cross-referencing requirements in the various sections and appendices of the FIIG, and for mechanized processing and retrieval of FIIG generated data. Absence of a MRC for a requirement indicates a lead-in to requirements with individual MRCs in Appendix B.

(a) The coding technique for providing MULTIPLE/OPTIONAL responses will not be used for a Section I requirement assigned Mode Code A or L that leads to Appendix B sketches with dimensional requirements.

#### (b) Identified Secondary Address Coding:

This technique is for extending the Master Requirement Code so that a unique address is provided for each application of the requirement in relation to the item and is authorized only as instructed within the requirement. Responses coded through this technique will always consist of the following: (1) Master Requirement Codes, (2) indicator code (a single numeric character determined by the number of positions contained), (3) identified secondary address code (1 to 3-digit alphabetic codes determined by the number of predicted replies), (4) the mode code, (5) the reply code and/or clear text response, and (6) end with a record separator (\*). Steps (1) through (6) are repeated for each application of the requirement.

#### (c) AND/OR coding:

A technique for extending the Master Requirement Code to provide a distinctive address for multiple responses to the same requirement. Responses coded through this technique will always consist of (1) Master Requirement Code, (2) mode code, (3) the response or reply code (as instructed by the requirement), (4) a single dollar sign (\$) for an OR condition, or a double dollar sign (\$\$) for an AND condition, (5) the mode code, (6) the response or reply code

## GENERAL INFORMATION

(followed by conditions (4) through (6) for each of the multiple responses) and (7) end with a record separator (\*). NOTE: Apply this technique only when instructed by the requirement sample reply (e.g.).

### (3) Mode Code:

A one-position alphabetic code that specifies the manner in which a response will be prepared. Each requirement assigned a MRC is also assigned a mode code. Sample replies follow each FIIG requirement displaying the proper construction of a response for the assigned mode code. The response to a requirement will always be prepared in accordance with the assigned mode code and sample reply except in the following instances:

(a) Use of E Mode Code replies is not authorized. If a reply needed to describe an item is not listed in the applicable table, contact the FIIG Initiator.

(b) Mode Code K may not be used for any requirement unless instructed by the requirement instructions.

### (4) Requirement:

This portion includes the characteristics data elements and data use identifiers required to identify and differentiate one item of supply from another, narrative definitions, and explanations as to use and method of expression. Instructions for coding and preparing replies are also provided.

### (5) Reply Code:

A code that represents an established authorized reply to a requirement.

#### d. Section III - Supplementary Technical and Supply Management Data:

This section includes those characteristics requirements necessary to support specific logistics functions other than National Stock Number assignment.

#### e. Appendix A - Reply Tables:

Tables of authorized replies to requirements and reply codes when the tables are too lengthy for inclusion in Section I/III, when applicable.

#### f. Appendix B - Reference Drawings:

This appendix contains representative illustrations which portray specific variations of one or more generic characteristics. If reference drawings contain requirements pages to be used in conjunction with illustrations for dimensioning purposes, the requirements pages will contain Master Requirement Codes, mode codes, and a statement of the requirement. A response to requirements on a requirements page is necessary only for those Master Requirement Codes applicable to the illustration selected.

#### g. Appendix C - Technical Data Tables:

## GENERAL INFORMATION

This appendix contains conversion charts and similar data pertinent to the requirements in Section I/III, when applicable.

3. Enter administrative MRC CLQL immediately following the last FIIG requirement reply, as instructed below:

<u>MRC</u>	<u>Mode</u> <u>Code</u>	<u>Requirement</u>	<u>Example</u>
CLQL	G	COLLOQUIAL NAME (common usage name by which an item is known)	CLQLGWOVEN WIRE CLOTH*

### 4. Special Instructions and Indicator Definitions

#### a. Measurements:

Unless otherwise indicated within a requirement example, enter all measurements in decimal form, carried to the nearest three decimal places, with a minimum of one digit preceding the decimal. For SI (metric), enter all measurements with a minimum of one digit before and after the decimal. For fraction to decimal conversion, see Appendix C.

#### b. Indicators:

A cross hatch (#) following an AIN, MRC, Reply Code or Drawing Number indicates for "ALL EXCEPT USA" use only.

### 5. Indexes

#### a. Index of Data Requirements

This index is arranged in alphabetic sequence by Master Requirement Code, cross-referenced to the applicable data requirement and page number(s).

#### b. Index of Approved Item Names

This index is arranged in alphabetic sequence referenced to Applicability Key.

#### c. Applicability Key Index

This index is arranged in Applicability Key Sequence.

### 6. Maintenance

Requests for revisions and other changes will be directed to:

INDEX OF APPROVED ITEM NAMES COVERED BY THIS FIIG

## INDEX OF APPROVED ITEM NAMES COVERED BY THIS FIIG

<u>Approved Item Name</u>	<u>INC</u>	<u>App Key</u>
ANTIMACASSAR, VEHICULAR SEAT	30023	BB
A disposable woven or nonwoven fabriclike covering used to protect the back and headrest and/or arms of seats installed in aircraft, trains, buses, and the like. Excludes COVER, HEADREST; and SLIPCOVER, FURNITURE.		
AWNING	02713	GA
A rigid or collapsible roof-like cover, generally attached to a wall and extended over or before a window or entrance. Used as a protection from the sun and other weather related elements.		
BEDSPREAD	05125	DA
Excludes COVER, BEDDING.		
BEDSPRING	08345	HF
A component of a bed, usually rectangular in shape, consisting of a number of springs supported by various types of frames. It is used to support the mattress. Includes boxsprings.		
BLANKET, BED	02129	CA
A bed covering designed to provide warmth. It is usually made of wool or wool and other fibers.		
BLANKET, CASUALTY	32918	CA
A covering, usually oblong, designed to provide warmth and protection to a wounded or injured person.		
BLANKET, FIRE	06349	CA
A broad piece of fabric used to extinguish small fires by smothering.		
BLANKET, RECEIVING	37502	CA
A small lightweight covering used to wrap an infant.		
BLANKET, SURGICAL	32920	CA
A covering used in surgical operations to protect the patient from the effects of undercooling. Excludes BLANKET, BED; and BLANKET, CASUALTY.		

FIIG T272  
GENERAL INFORMATION  
INDEX OF APPROVED ITEM NAMES COVERED BY THIS FIIG

<u>Approved Item Name</u>	<u>INC</u>	<u>App Key</u>
BLANKET, WARMING, HYPOTHERMIA	47866	CA
A covering used to consistently maintain a patient's temperature (by means of hot and cold water); for use in the operating room, and in the surgical intensive care unit (ICU), in order to reduce shivering, improve body temperature, and stabilize heart rate. This item is designed to be hooked-up to a warming unit regulator; and can be used to transfer heat where it is feasible to cover the upper/lower body surface area. Excludes BLANKET, BED; BLANKET, CASUALTY; and BLANKET, SURGICAL.		
BOLSTER, BED	66438	HC
A long pillow or cushion, often cylindrical, that is used to support the head of a person lying on a bed. It is placed under the pillows. Excludes: PILLOW, BED.		
BOLSTER CASE	66439	DB
A cloth case used to cover a BOLSTER, BED. Excludes: PILLOW CASE.		
COVER, BEDDING	32919	BC
A non-formfitting material that encloses the complete bedding such as mattress, blankets, and pillows. Excludes BEDSPREAD.		
COVER, HEADREST	26819	BB
An item of flexible material designed to fit over the headrest of a seat back. It is a removable item used as a protective covering.		
COVER, MATTRESS	02127	BA
A form fitting item designed to fully or partially inclose a mattress for sanitation and/or protection against dust, soil and the like.		
COVER, MATTRESS PAD	30142	BA
A form-fitting item designed to fully or partially inclose a mattress pad for sanitation and/or protection against dust, soil and the like.		
COVER, PILLOW	05116	BC
An item made of cloth, plastic, etc., designed to fit over a pillow. The open end is enclosed by tie tapes, slide fasteners or the like. Used for ornamental or protection of a pillow. Excludes PILLOWCASE.		
COVER, SURGICAL INSTRUMENT STAND	27390	BB
A fabricated cover designed to slip over and protect surgical instrument stands.

---------------------------	------------	----------------

Curtain

1. (Household type) A loosely hanging drape used as an ornamental and/or protective covering for an opening, fabricated from textile or nontextile material. The modifier should denote where used, such as window or shower.

CURTAIN (1), AIR PORT	01729	AA
-----------------------	-------	----

CURTAIN, BLACKOUT	60359	AA
-------------------	-------	----

CURTAIN (1), COMPARTMENT DIVISION	01730	AA
-----------------------------------	-------	----

A curtain which when drawn will divide a compartment or space into several areas.

CURTAIN (1), DOORWAY	01731	AA
----------------------	-------	----

CURTAIN, PHOTOGRAMMETRIC VERTICAL REFLECTING PROJECTOR	01732	AA
-----------------------------------------------------------	-------	----

CURTAIN, PROTECTIVE, HOIST-TRAIN MECHANISM, SONAR	47030	AA
------------------------------------------------------	-------	----

An item designed specifically to surround a deck opening containing sonar hoist machinery to prevent foreign object damage to the machinery and to provide safety and protection to personnel outside the area. It is fabricated of heavy neoprene or the like and is designed to accommodate hooks and fasteners to secure the curtain to a frame.

CURTAIN (1), SHOWER	01733	AA
---------------------	-------	----

CURTAIN (1), WINDOW	01734	AA
---------------------	-------	----

CUSHION, CHAIR AND STOOL	20439	HA
--------------------------	-------	----

An item consisting of a cover filled with foam rubber, sponge rubber, kapok, or similar material. See also PAD, CHAIR, FELT.

CUSHION, WHEELCHAIR SEAT	47839	HA
--------------------------	-------	----

An item consisting of resilient material(s) and may include a covering. It is used to promote seating comfort and is also an aid for posture correction and orthopedic problems. Excludes CUSHION, CHAIR AND STOOL; and PAD, PRESSURE POINT, PHYSICOTHERAPEUTIC.

DISHCLOTH	07597	DB
-----------	-------	----

A small piece of lightweight cloth made of an absorbent material cut to a specific size. It is designed for washing tableware.

FIIG T272  
GENERAL INFORMATION  
INDEX OF APPROVED ITEM NAMES COVERED BY THIS FIIG

<u>Approved Item Name</u>	<u>INC</u>	<u>App Key</u>
DOILY, TEXTILE	02693	EA
A small, ornamental piece of woven fabric on which tableware, vases and similar objects are placed. In addition to their ornamental or decorative function, doilies protect the surface on which they are used against the abrasive action of the objects under which they are placed.		
FAIR LINEN, ALTAR	13132	EA
An item of fine cloth used for covering the top of an altar. Excludes COVER, ALTAR.		
HANGER, COAT	03441	LA
INSECT NET PROTECTOR	48614	MA
An item fabricated of cloth netting designed to be used with beds, cots, or in the field with a SHELTER HALF, TENT to prevent entrance of insects including mosquitoes. Does not include accessories.		
MAT, BATH	07598	BD
An item designed to protect the floor from water during and after bathing. It may be made of cork, rubber, or a textile fabric such as terry cloth. Excludes MAT, BATHTUB AND SHOWER and MAT, FLOOR.		
MAT, BATHTUB AND SHOWER	22450	BD
A preformed item designed for use in a bathtub or shower as a safety measure to prevent the user from slipping or falling. It will not stain, injure or mar the bathtub or shower floor. Excludes MAT, BATH and MAT, FLOOR.		
MAT, PLACE	02691	FA
A piece of material used as a protector under an individual diners service, either on a bare table surface or on a cloth covering it.		
MAT, SLEEPING	68176	HE
An item generally used for sleeping outdoors. It is made of various materials such as open cell foam, cloth, and the like. It may be inflatable (including self inflatable). It may be fitted with hook/loop tabs and straps to roll it into a small and compact unit. It has a thermal insulation capacity and may be protected or treated against water, humidity, stains, fungus and bacteria. Excludes MATTRESS, PNEUMATIC.		
MATTRESS, BED	08278	HB
An article of bedding constructed of various kinds of padding materials, covered with a ticking, and tufted or otherwise fastened to retain the materials. It may or may not have inner springs.		
MATTRESS CASE #	48490	HB
An item of flexible material such as ticking or the like. It is designed to be filled with padding materials and tufted or otherwise fastened to retain the materials to form a MATTRESS, BED. Excludes COVER, MATTRESS.		

FIIG T272  
GENERAL INFORMATION  
INDEX OF APPROVED ITEM NAMES COVERED BY THIS FIIG

<u>Approved Item Name</u>	<u>INC</u>	<u>App Key</u>
MATTRESS, CHILD'S CRIB	40331	HB
An article of bedding constructed of various padding materials with a cover.		
MATTRESS, CHILD'S CRIB, HOSPITAL	33142	HB
MATTRESS, HOSPITAL BASSINET	08279	HB
MATTRESS, LITTER	08281	HB
MATTRESS, PNEUMATIC	07850	HE
An article of bedding which is air inflatable and when deflated can be rolled into a compact unit. It is usually made of rubber or rubberized cloth.		
MATTRESS, STRETCHER	08282	HB
NAPKIN, TABLE, TEXTILE	02694	EA
A small piece of woven fabric generally used at a dining table for wiping the lips or fingers and for protecting the diner's clothing.		
PAD, MATTRESS	16908	HD
A pad, usually quilted, for use on beds for protection of mattresses.		
PAD, PLAYPEN	24348	HD
A pad designed for use on the floor of a small enclosure in which an infant plays.		
PAD, TABLE	02692	FA
A pad of flexible material used under a tablecloth or table cover to provide additional protection to the table surface and as insulation against sound.		
PILLOW, BED	02123	HC
A cloth casing filled with feathers, down, cotton lintens, etc., used as a support for the head, as in sleeping. Excludes PILLOW, CASKET and PILLOW, PNEUMATIC.		
PILLOW, PASSENGER HEADREST	02124	HC
A small item filled with feathers, down, foam rubber, vegetable or synthetic fibers and used as a support for the head by passengers. Excludes PILLOW, BED.		
PILLOW, PNEUMATIC	07851	HE
A rubber or rubberized cloth casing which is air inflatable and, when deflated, can be rolled or folded into a compact unit. Used as a support for the head, as in sleeping. Excludes PILLOW, BED and PILLOW, CASKET.		

FIIG T272  
GENERAL INFORMATION  
INDEX OF APPROVED ITEM NAMES COVERED BY THIS FIIG

<u>Approved Item Name</u>	<u>INC</u>	<u>App Key</u>
PILLOWCASE	13681	DB
A removable covering for a pillow. It is made of linen cloth, cotton cloth, paper or the like. Excludes COVER, PILLOW.		
SCARF, TABLE	02695	EA
A piece of woven fabric, generally of ornamental design, used individually or with matching doilies as a set on occasional tables, buffets, or dressers.		
SHADE, ROLLER	02667	JA
A cloth, paper, plastic or other opaque fabric flexible screen, mounted on a roller, used to regulate the light passing through a window or opening and to obstruct the view from within or without.		
SHEET, BED	02125	DC
A large rectangular piece of cloth, usually made of cotton percale or muslin, used as an article of bedding.		
SHEET, CRIB	47381	DC
A rectangular piece of cloth, serving as a basic article of bedding on a child's crib. Excludes SHEET, BED.		
SLIP COVER, FURNITURE	19774	BA
A removable, fitted cloth cover for chairs, sofas, and the like.		
STRETCHER, SHOE	03442	KA
TABLECLOTH	02697	EA
A piece of pliable fabric, woven or otherwise constructed, used for covering a table before tableware is placed, or set, for dining.		
TAPE, LADDER, VENETIAN BLIND	07633	PA
An item consisting of two side straps connected with cross straps for suspending slats.		
THIMBLE, SEWING	03443	KA
A small cap of metal, plastic, and the like, designed to fit on the finger while sewing. It protects the finger in pushing the needle through the fabric.		
TIEBACK, CURTAIN	40950	AB
A strap, belt or the like designed to hold a curtain off to the side or in a position other than hanging straight down. It may be of the same material as the curtain or any other suitable material.		

FIIG T272  
GENERAL INFORMATION  
INDEX OF APPROVED ITEM NAMES COVERED BY THIS FIIG

<u>Approved Item Name</u>	<u>INC</u>	<u>App Key</u>
TOWEL, BATH	01817	DB
A piece of mediumweight to heavyweight cloth made of highly absorbent material, such as terry cloth, cut to a specific size and used to dry the body after bathing		
TOWEL, DISH	01818	DB
A piece of lightweight cloth made of absorbent material, such as crash, cut to a specific size and used for drying tableware.		
TOWEL, GLASS	01819	DB
A towel designed to wipe and/or polish glassware, such as drinking glasses, vases, or test tubes.		
TOWEL, HAND	01820	DB
A piece of lightweight cloth made of absorbent material, such as huck or birdseye, cut to a specific size and used for drying the hands and/or face. Excludes TOWEL, BATH.		
VENETIAN BLIND	02668	NA
A blind capable of being raised or lowered and having numerous thin slats placed horizontally one above another, which can be set simultaneously at any desired angle. It is used to regulate the light passing through a window or opening and to obstruct the view from within or without.		
VENTILATOR, MATTRESS	22493	BE
A small tubular item having a perforated face or fine screen in the outer end. It is inserted at specified intervals along the sides and ends of an innerspring mattress to provide for free passage of air into the spring section of the mattress.		
WASHCLOTH	01821	DB
A small piece of mediumweight to heavyweight cloth made of highly absorbent material, such as terry cloth, cut to a specific size (usually square) and used in washing the body.

## **FIIG Change List**

FIIG Change List, Effective July 3, 2009

Deleted MRC ECAT and PPRM from FIIG.

Revised NOTE for MRC ALAX.

Added reply codes KU- BEDDING, BED LINENS, AND TOWELS - BIOBASED and NR-  
REVIEWED - DOES NOT MEET SOME ENAC CRITERIA to MRC ENAC.
